

RADIO-UITBARSTINGEN ZON 05 JULI 2013

Dit was de meeste actieve dag sedert ik hiermee gestart ben (midden 2010), 48 uitbarstingen werden geregistreerd, meestal gerelateerd met zonnevlekgroepen 11785 en 11787.

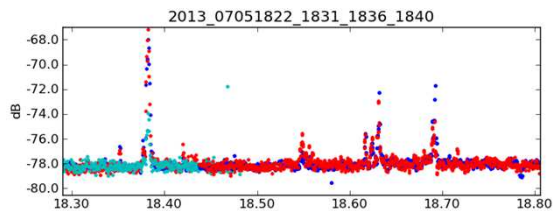

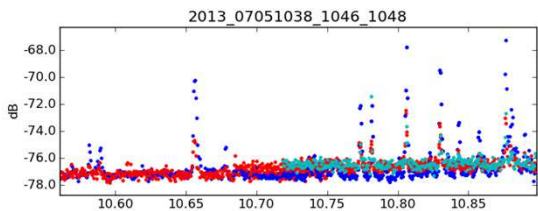

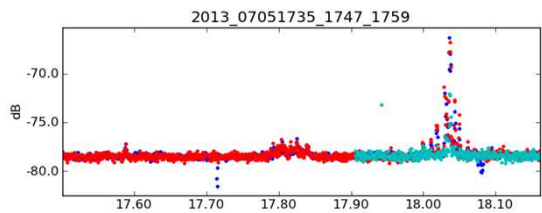

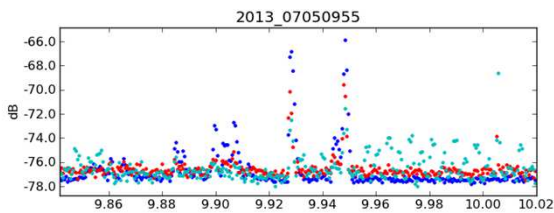

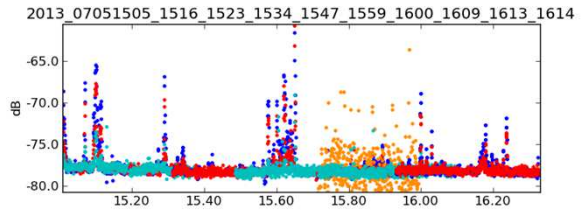

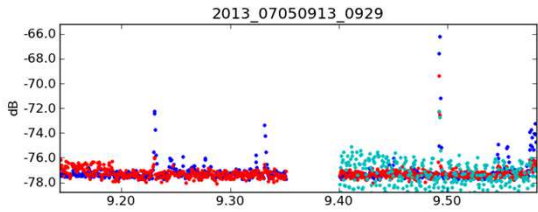

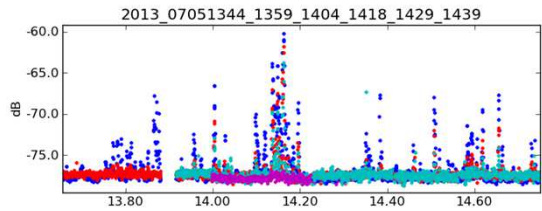

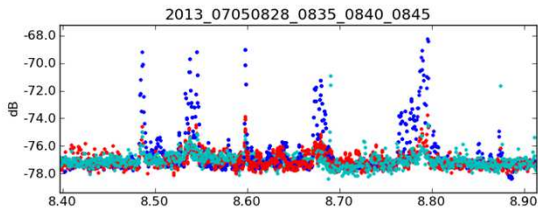

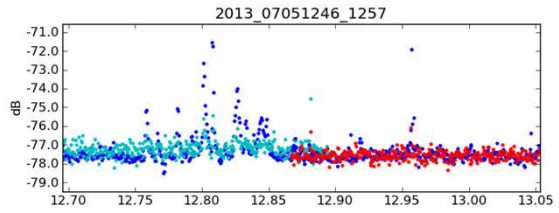

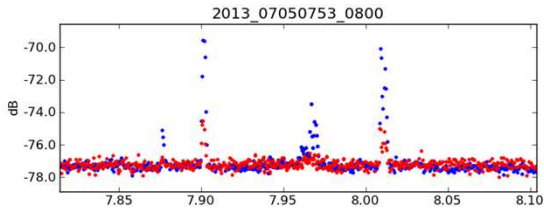

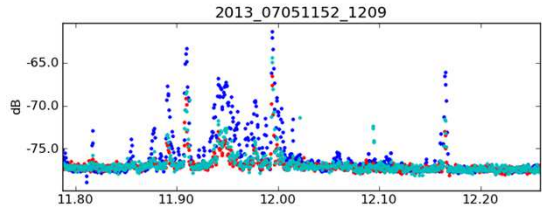

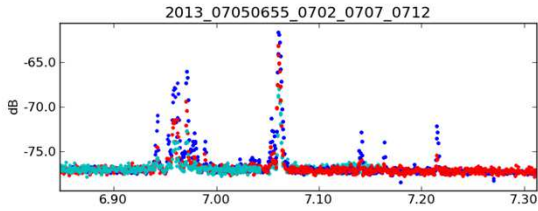

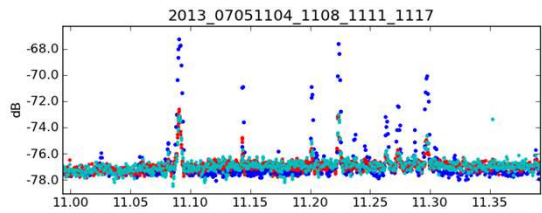

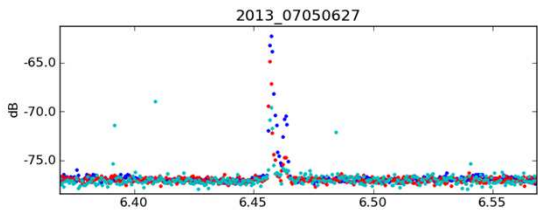

Hieronder een overzicht van de ruisgrafiek van de ganse dag van mezelf en van Felix. Meer informatie op <http://www.matjer.net>

Op de volgende bladzijden alle registraties in detail. Ik combineer hiervoor intussen 6 gegevensstromen afkomstig van 4 personen.
